SMC: provide the noted file to all DAACs.

DAAC Install Instructions:
This is for MODIS level 0 ESDTs, used at GDAAC (resolves NCRs 25839 and 25826). Install ESDTs as needed
Other DAACs can decide if they need these ESDTs.
Since Ingest DB patch 31 must be installed NCRs 24974 and 25128 are also resolved. (By installing all Ingest files above except the two for Patch 32 a DAAC could resolve just NCRs 24974 and 25128.)

Note: DAAC must be at Ingest DB patch level 31 to proceed to install patch 32. If not take necessary steps to upgrade to patch level 31 using the files DB patch 31first and then proceed with the remaining files..

1. Get File listed above from SMC distribution;
2.Install these test executables by manually copying (using cp from the UNIX command line) these new executables over ANY AND ALL existing instances of these files, making sure to retain the appropriate ownership and permissions.
   2a. Install the files for the db patch 31 (if needed) 32 using same permissions levels and ownership as previous db patch files.
   2b.. Install the listed ESDT files using same permissions levels and ownership as previous ESDT files.
