Title of Change: Test Executable 5B.07_ESDT.23 FOR GSFC. Includes MODIS TERRA N's & M's .001s and .199s; and MODIS AQUA N's & M's .100s LongName changes, Changed NumberOfSensors, AssociatedPlatformInstrumentSensor, updated QA .

This Test Executable series [5B.05/6/7_ESDT.xx) is being delivered as a series of TAR files delivering related ESDTs. Each DAAC will need some of these ESDTs but not all. Review each TAR file for your sites needs and take only the ESDTs that will be required for your needs. The TE will be labeled 5B.05_ESDTxx if it is from the 5B.06 baseline and 5B.06_ESDTxx if it is from the 5B.07 baseline.

Note: Each TAR file listing shows the NCRs addressed and at least the first line description of the NCR. (see below)

This TE can be loaded on top of 5B.03, 5B.04 , and 5B.06 installations.

The previous TEs for ESDTs [5B.05/6_ESDT.01 and .02 and .03 and .04 and .05 and .06 ,etc.] are still valid.
Except 5B.06_ESDT.08 is obsolete.

Any ESDTs required by a DAAC should be taken from ESDT.01 first and then take any ESTDs needed from 5B.05/6/7_ESDT.02 and so on. Updates and installs should follow this same pattern.

ACTIONS:

CM:

Please Build three SUN TAR File for the merged ESDT files from current 5B6A baseline as listed below and provide as Test Executable 5B.07_ESDT.23. Provide the Tar files to the SMC.

All these ESDTs can be Updated with the Update ESDT command.

DAAC Install Instructions :

1. Identify the proper Test Executable files
Get Files listed above from SMC distribution;
2. UnTAR the files to a staging area.
3. Use the 'cp' from the command line to copy the ESDT files, storing these files in accordance with local DAAC procedures (dir. where ESDT files are held usually: lib/ess), store in mode by mode, using the same ownerships and permission levels as existing ESDT files..
4. Follow any special NOTES listed with the TAR file(s) above and, Then install the ESDTs as needed:
To install/update the ESDTs use the Science Data Server GUI.
5. Remember that for an initial install of an ESDT (NOT FOR UPDATES), an insert for each ESDT should be done through the Stmgt GUI. It is NOT recommended that these entries be made via an isql insert!!!!One ESDT per GUI entry.
